

Claims:

1. A fishing lure comprising a body (1) manufactured at least for the part of its colouring substantially as a ready bait body, at least one hook fastener (2), line fastener (6) and, if needed, a swimming plate (4) attached to the body, **characterized in**,
5 that the body is enclosed within a coat (5) manufactured of a transparent material by die-casting in a die space where the bait body is in.
2. The lure according to claim 1, **characterized in**, that the coat (5) is made of a material bonding to the surface material of the body.
3. The lure according to claim 1 or 2, **characterized in**, that the coat (5) is cast as
10 multiple layers.
4. The lure according to claim 3, **characterized in**, that the materials of the different coat layers have different refractive indexes.
5. The lure according to claim 3 or 4, **characterized in**, that the materials of the different coat layers have different hardness.
6. The lure according to any of the foregoing claims, **characterized in**, that the surface of the bait body (1) is furnished with embossments.
15
7. The lure according to any of the foregoing claims, **characterized in**, that by manufacturing the coat layer (5) of the lure, the lure has been equipped with elements having influence on its swimming properties.
8. The lure according to any of the foregoing claims, **characterized in**, that by manufacturing the coat layer (5) of the lure, the lure has been equipped with elements having influence on its appearance.
20
9. The lure according to any of the foregoing claims, **characterized in**, that the body (1) comprises an inner construction where the light is refracted.
10. The lure according to claim 11, **characterized in**, that the inner construction is
25 formed of ribs (9).

AMENDED SHEET

ART 34 AMDT

11. The lure according to any of the foregoing claims, characterized in, that the coat is cast of silicon rubber.
